

EUROCASA

campera

presentation

Our CAMPERA range of homes allows us to adapt your chosen home to any environment without adversely affecting the surroundings.

Perfect harmony between people and their natural surroundings.

fun

freedom

happiness

Campera philosophy

Any place. Any distance. Coastal or mountain location.
With our CAMPERA range of houses you can enjoy your home wherever you desire to go.
"Live in harmony with your spirit truly free"

Campera exteriors

We take care that the exterior design
of our CAMPERA range of houses
harmonizes with your chosen environment.

great ideas
“we are where you
want us to be”

At EUROCASA we are here to create your home, on your own individual plot of land or develop on large recreational areas such as golf courses, camp sites, urbanizations etc.

insulation and information

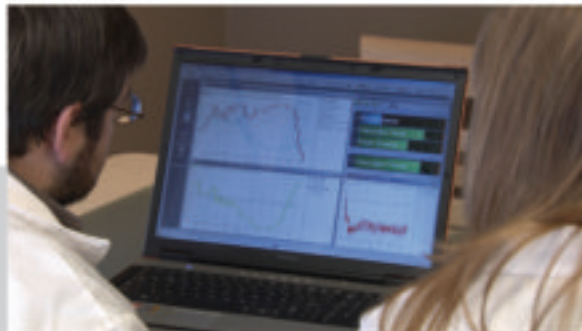

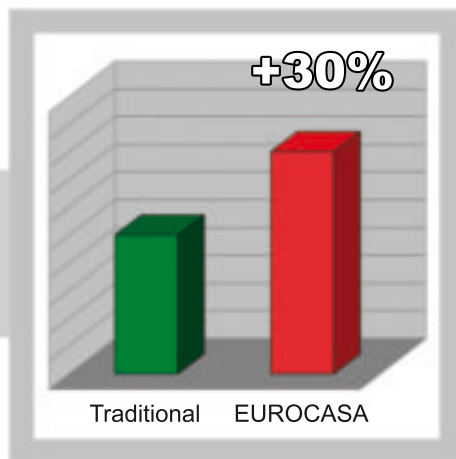

thermal insulation

proof!

Technical trials carried out by independent laboratories specializing in thermal insulation have shown that constructions by EUROCASA are far superior to traditionally built homes.

acoustic insulation

sleep soundly!

Trials with regards to noise levels show that the constructions by EUROCASA, have far greater acoustic insulation than traditional constructions.

EUROCASA

past and present

Since 1982 EUROKASA has been innovative in the construction of prefabricated houses, continuously updating their methods and ideas to guarantee customers a high quality lifestyle.

Located in the Villalonqu jar Industrial Estate in Burgos, our modern manufacturing facilities extend over an area of 60,000m² and enable us to ensure exceptionally short deadlines while guaranteeing high quality control.

At EUROKASA we always maintain strict control over quality and safety based on total quality processes laid down by the EC and ISO certificates 9001:2000.

THE COMPANY

innovation and design

At EUROCASA, thanks to the advanced technology of our research and development department and our well equipped offices, also to our team of highly qualified architects, engineers, decorators, designers etc. (carrying out specific designs to order) we are constantly innovating to guarantee our pre fabricated constructions.

EUROCASA

ecological constructions

...years of dedication and commitment to the future have led EUROCASA to up-to-date ecological constructions with 100% of our prime wooden materials being supplied from forests where reforestation and attention to the environment is rigorously maintained.

The certificate PEFC allows EUROCASA to reassure customers that our use of prime forest materials respects the environment and promotes conservation.

PRODUCTION

technology and innovation

At EUROCASA we make and install all of the components contained within our houses, furniture, walls, ceilings, windows, metalwork, welding, painting, electrical installations and plumbing, etc.

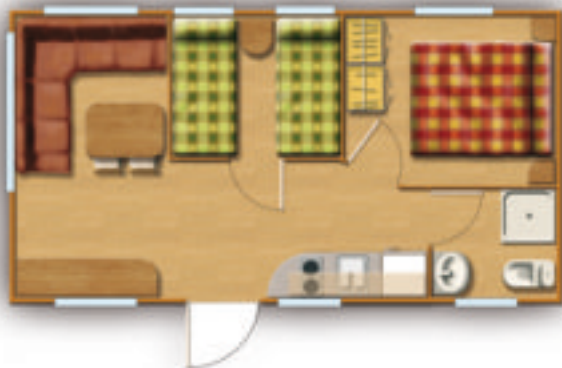

We are at the fore front with state-of-the-art machinery and constant update of techniques that ensure the highest quality production process.

For EUROCASA innovation is not just a responsibility but a fundamental, deep rooted reality which we seek to demonstrate in everything we do.
