

EUROCASA

special constructions

design

All of our construction designs are perfectly adaptable in composition and layout.

The technical department at EUROCASA will advise on finishes and layouts depending on our clients' needs.

technology

In the research and development department at EUROCASA we keep abreast of all the latest products and construction methods, making full use of state-of-the-art technology, guaranteeing our customers a first class product.

We are at the forefront with the latest machinery, constantly updating our techniques, assuring high quality throughout our manufacturing process.

quality

At EUROCASA we constantly maintain strict quality and safety controls based on total quality processes laid down by EC regulations and regulations ISO 9001:2000.

The certification PEFC allows EUROCASA to guarantee that all prime wooden materials are derived from sources which respect the environment and promote conservation and improvement.

customer service

Customer service at EUROCASA guarantees that clients can always contact us to have any questions answered promptly.

Before and after service, guarantees customer satisfaction.

we advise

At EUROCASA we offer you full advice.

We help you with the installation of your house on to your chosen site making your move easy and pleasurable.

no limits

At EUROCASA there are no limits.

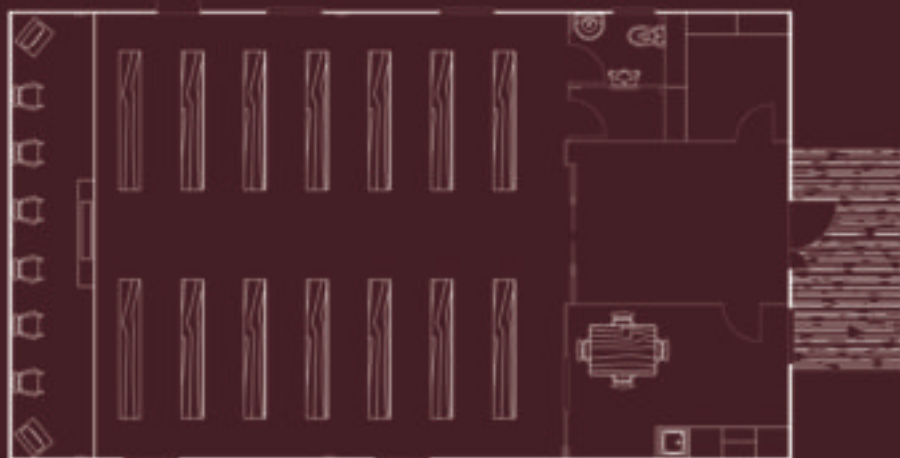

We will adapt our products to suit your needs including plans for existing or future constructions.

churches

At EUROCASA, apart from our commitment to quality,
it is of equal importance to adapt our products
to your project and a quick completion and delivery.
A church for your community and
all your prayers answered.

designed to your specifications

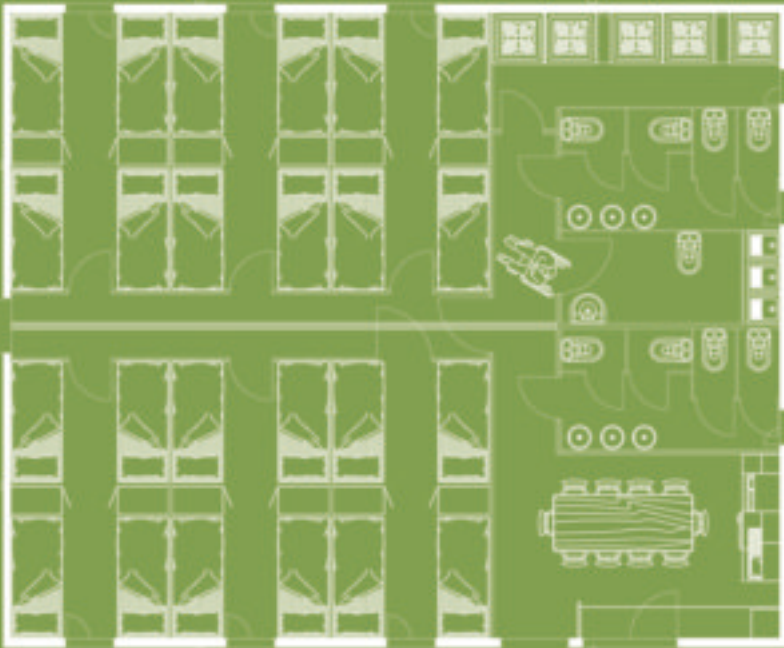

retreats

Retreats, camp sites,
summer and holiday homes. Community
construction projects developed by EUROCASA
with maximum comfort, space and durability in mind.

designed to your specifications

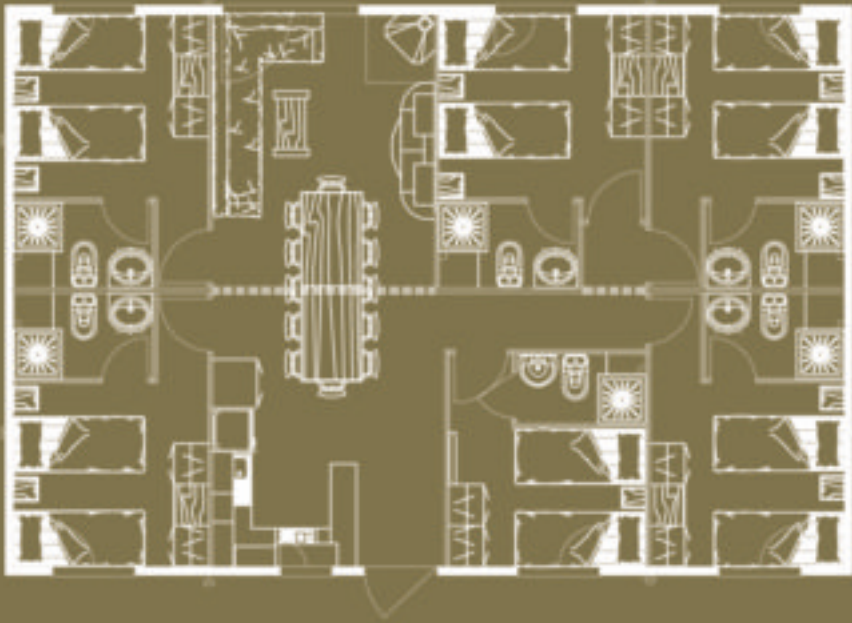

rural houses

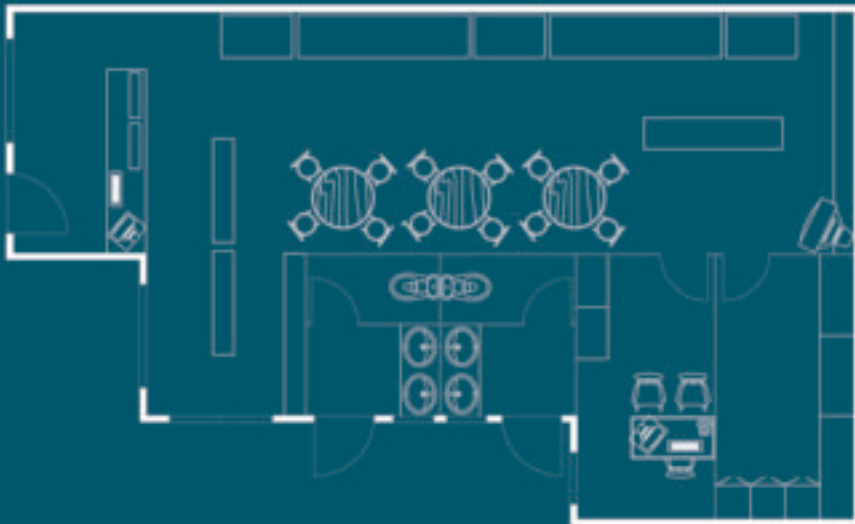

In a rural house, as in all holiday installations, one of the main features is the quality of materials used, durability and the adherence to strict regulations laid down by local authorities.

designed to your specifications

designed to your specifications

petrol stations

EUROCASA produce special constructions in the minimum amount of time, adapted to your unique company image, aware of the importance of the technical details required for petroleum activities.

offices

Company offices and client reception centres are increasingly more technologically designed and facilitate an excellent means of communication. We design your offices to meet your company needs, allowing you to expand the infrastructure of your business with optimum growth.

designed to your specifications

workshops

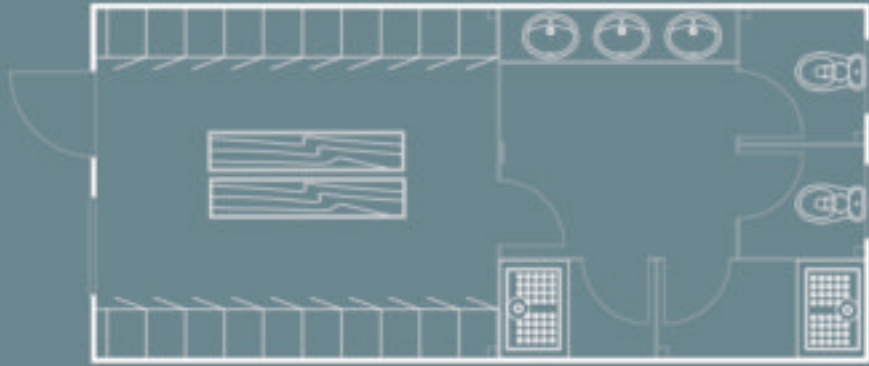

At EUROCASA we have the ideal solution for your workshop, complying with your company regulations, putting to one side architectural limitations and optimizing your space for maximum efficiency.

designed to your specifications

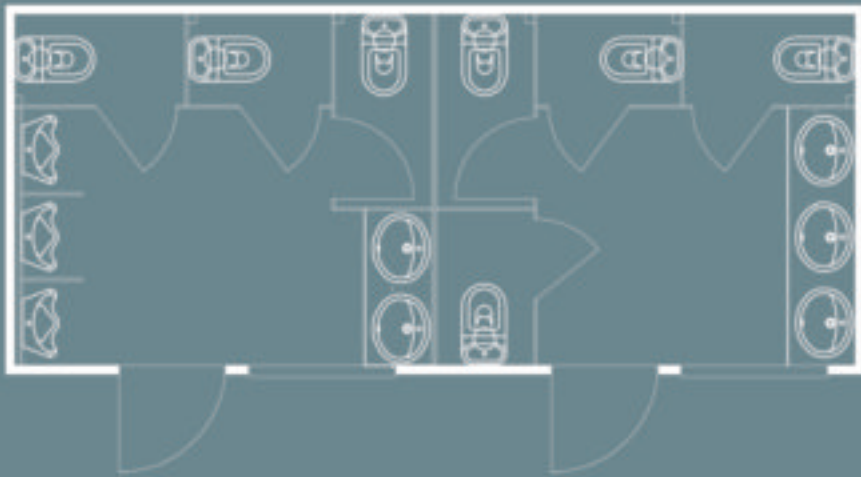

designed to your specifications

Changing rooms and Shower rooms

EUROCASA can supply personalized designs with rapid installation for your company employees, sport and recreational areas with changing rooms, a variety of choice and design, easy to maintain, made of heavy duty materials and complete with access for the disabled.

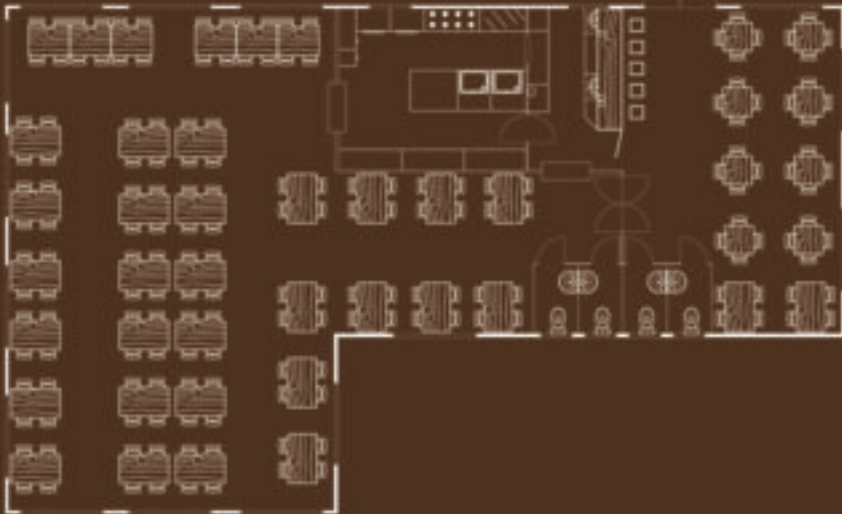

restaurants

Another solution by EUROCASA has been to create areas which unite quality and comfort for large numbers of people, such as restaurants and function halls for social events.

This type of construction can incorporate all that you need for the success of your business, industrial kitchens, special toilet facilities, large spaces etc.

designed to your specifications

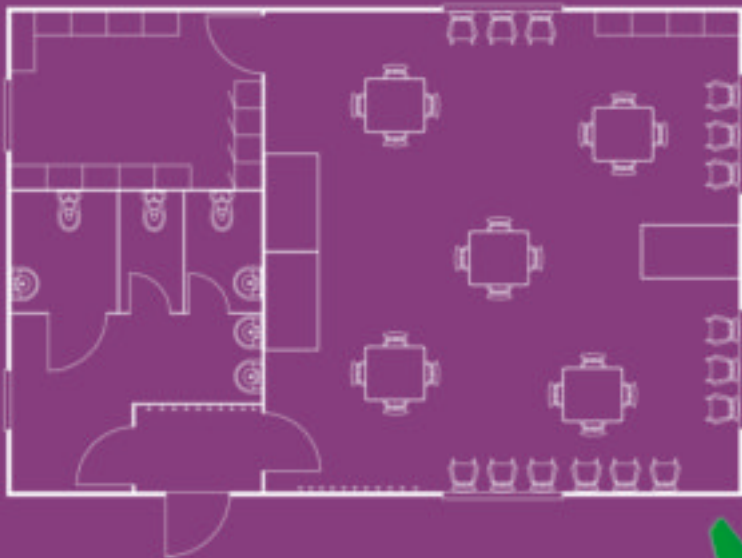

day care centres day nurseries

More fantastic, prefabricated, construction ideas. EUROCASA is committed to making these buildings safe, comfortable and pleasant.

Ample space to realize activities, exercises and games with high quality construction materials which assure maximum durability, always complying strictly to authority regulations.

designed to your specifications

laboratories

EUROCASA has successfully developed modular constructions with special attention given to technical work space, where safety and cleanliness is of utmost importance.

Work spaces designed for specific activities and appropriate for chemical, information and communication technology etc.

transport and installation

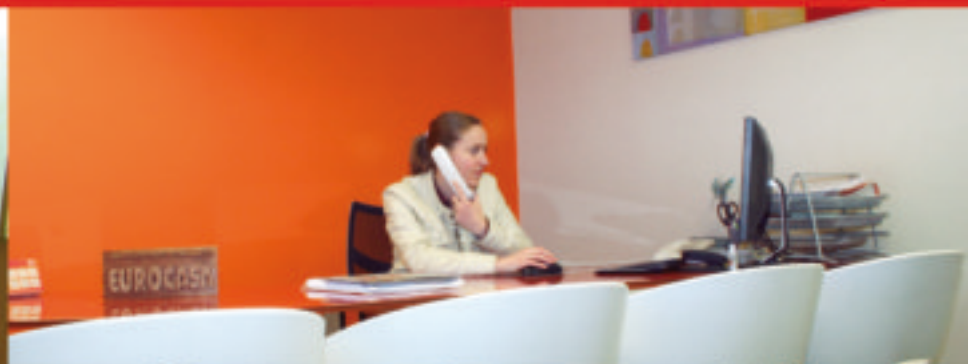

you should know...

If you have found that ideal place for your new home, stop worrying, EUROCASEA will install your house wherever you choose.

EUROCASA

past and present

Since 1982 EUROCASA has been innovative in the construction of prefabricated houses, continuously updating their methods and ideas to guarantee customers a high quality lifestyle.

Located in the Villalonqu jar Industrial Estate in Burgos, our modern manufacturing facilities extend over an area of 60,000m² and enable us to ensure exceptionally short deadlines while guaranteeing high quality control.

At EUROCASA we always maintain strict control over quality and safety based on total quality processes laid down by the EC and ISO certificates 9001:2000.

THE COMPANY

innovation and design

At EUROCASA, thanks to the advanced technology of our research and development department and our well equipped offices, also to our team of highly qualified architects, engineers, decorators, designers etc. (carrying out specific designs to order) we are constantly innovating to guarantee our pre fabricated constructions.

EUROCASA

ecological constructions

...years of dedication and commitment to the future have led EUROCASA to up-to-date ecological constructions with 100% of our prime wooden materials being supplied from forests where reforestation and attention to the environment is rigorously maintained.

The certificate PEFC allows EUROCASA to reassure customers that our use of prime forest materials respects the environment and promotes conservation.

PRODUCTION

technology and innovation

At EUROCASA we make and install all of the components contained within our houses, furniture, walls, ceilings, windows, metalwork, welding, painting, electrical installations and plumbing, etc.

We are at the fore front with state-of-the-art machinery and constant update of techniques that ensure the highest quality production process.

For EUROCASA innovation is not just a responsibility but a fundamental, deep rooted reality which we seek to demonstrate in everything we do.
