insulation and information

thermal insulation

proof!

Technical trials carried out by independent laboratories specializing in thermal insulation have shown that constructions by EUROCASA are far superior to traditionally built homes.

acoustic insulation

sleep soundly!

Trials with regards to noise levels show that the constructions by EUROCASA, have far greater acoustic insulation than traditional constructions.

after sales advice and information

of excellent,
high quality
workmanship.

transport and installation

you should know...

If you have found that ideal place for your new home, stop worrying, EUROCASEA will install your house wherever you choose.

EUROCASA

past and present

Since 1982 EUROCASA has been innovative in the construction of prefabricated houses, continuously updating their methods and ideas to guarantee customers a high quality lifestyle.

Located in the Villalonqu jar Industrial Estate in Burgos, our modern manufacturing facilities extend over an area of 60,000m² and enable us to ensure exceptionally short deadlines while guaranteeing high quality control.

At EUROCASA we always maintain strict control over quality and safety based on total quality processes laid down by the EC and ISO certificates 9001:2000.

THE COMPANY

innovation and design

At EUROCASA, thanks to the advanced technology of our research and development department and our well equipped offices, also to our team of highly qualified architects, engineers, decorators, designers etc. (carrying out specific designs to order) we are constantly innovating to guarantee our pre fabricated constructions.

EUROCASA

ecological constructions

...years of dedication and commitment to the future have led EUROCASA to up-to-date ecological constructions with 100% of our prime wooden materials being supplied from forests where reforestation and attention to the environment is rigorously maintained.

The certificate PEFC allows EUROCASA to reassure customers that our use of prime forest materials respects the environment and promotes conservation.

PRODUCTION

technology and innovation

At EUROCASA we make and install all of the components contained within our houses, furniture, walls, ceilings, windows, metalwork, welding, painting, electrical installations and plumbing, etc.

We are at the fore front with state-of-the-art machinery and constant update of techniques that ensure the highest quality production process.

For EUROCASA innovation is not just a responsibility but a fundamental, deep rooted reality which we seek to demonstrate in everything we do.
